

X-RAY FOR EXPORT

TWO LEADING hospitals in New Zealand, Palmerston and Wellington, are now being equipped with Deep Therapy apparatus.

The order for each hospital was for one 250,000 volt Deep Therapy Apparatus, comprising a gantry, tubehead assembly, control unit, H.T. generator and oil cooler plus treatment accessories. The consignment left this country in June.

For many years Marconi Communication and Industrial instruments have been exported in large quantities. Marconi Instruments are taking an increasingly important part in the export of electro-medical and X-ray equipment.

Marconi Instruments Deep Therapy X-ray equipment starts on its journey from St. Albans (above right) to hospitals in New Zealand. Below, equipment unloaded in the docks at Wellington
